

# OneDrive Roll Out Schedule

Last revised: July 2020  
Last reviewed: July 2020

Ministry of Central Services

The document below lists the OneDrive roll out dates as part of the overall Microsoft Office 365 project.

[OneDrive](#) is being implemented across government in a phased approach (scheduling by ministry/agency).

The schedule for the next phases is still being determined, and may be updated based on the experience of the first migrations.

OneDrive will be your new individual working drive, replacing the H: Drive, with the added benefit that your files are saved in the cloud so you can get to it from anywhere you have an internet connection, on your desktop, laptop, tablet or phone.
